EUROMONEY

Euromoney index 1992

How to use the index

The first section lists articles by author, the second section by subject. References are in the form: month/page and cover the period January to December 1992. References to supplements are given a letter coding. By looking down the month/page column of the subject entry Supplements, the same coding can be found and thus the appropriate supplement. For example, under the subject heading Eurobonds is the subheading Sovereign borrowers dominate, with the reference Sept/W6. Turning to the subject entry Supplements, and tracing down the month/page column, reference can be found to Sept W1-W120 against the supplement entitled World's best credits. Thus information on sovereign borrowing in the Euromarkets can be found on page six of the 120-page supplement to the September issue.

The index is distributed free to subscribers. Extra copies, priced £3 including postage, are available from the Subscriptions Dept, Euromoney Publications PLC, Nestor House, Playhouse Yard, London EC4V 5EX.
